RESEARCH EXPERIENCE

Tools for Motif Conservation Analysis, PhD Project

May 2015 - Ongoing

Guide: Prof. Anton Valouev

Dept. of Preventive Medicine, Keck School of Medicine, USC

Motifs predicted by motif discovery tools can often not be the ‘true motifs’ and can have significant p-value(or E-values) for even ‘false motifs’. We hypothesized that a ‘true motif’ should exhibit high evolutionary conservation scores. MoCA makes use of PhyloP and Gerp scores to assess the conservation profile of motif bases.

We used MoCA to analyze ENCODE Chip-Seq datasets and found that the ‘true motifs’(ones which have been validated experimentally) do exhibit high conservation scores and that these are statistically significant when compared to the scores of flanking regions or randomly sampled regions.

MoCA is available as a web-service at <http://moca.usc.edu>

Source: <https://github.com/saketkc/moca>

Pattern Recognition in Clinical Data, Masters Thesis

Apr 2013 - Jul 2013

Guide: Prof. Santosh Noronha

Dept. of Chemical Engineering, IIT Bombay

Awarded Outstanding Thesis Award

Multiple methods exist for determining oncogenic ‘driver’ mutations. These tools often have non overlapping predictions and input format is tool specific.

We developed a Galaxy based toolbox to run such prediction tools in parallel with a standard input format. The end results are presented as an intuitive heatmap indicating mutations which are predicted to be drivers by a majority of the tools. The results are summarized in the following preprint: ["GalDrive: Pipeline for comparative identification of driver mutations using the Galaxy framework"](#)

In a separate project, we analyzed proteomics data from Glioblastoma patients and predicted a smaller set of marker genes. This resulted in the following publication: ["Autoantibody Profiling of Glioma Serum Samples to Identify Biomarkers Using Human Proteome Arrays"](#).

Automated Mining of Reaction Patterns

May 2012 - Jul 2012, Jan 2014 - Mar 2014

Guide: Dr. Syed Asad Rahman Dr. Dame Janet Thornton Lab, EMBL-EBI, Cambridge(UK)

EC-BLAST is a novel tool to compare enzymes and map reactions. We used clustering based approaches to highlight misclassified enzymes in the established enzyme classification system(EC).

We developed a web-service that facilitated automated job submissions to back end clusters at EBI that led to significant reduction in job runtime.

Next Generation Sequencing, Supervised Learning Project

Jul 2012 - Dec 2012

*Guide: Prof. Santosh Noronha**Dept. of Chemical Engineering, IIT Bombay & ACTREC*

We developed automated pipelines using Python to analyze whole genome sequence data of cancer tumors. As part of the project, I also contributed BWA and samtools wrappers to Biopython, a Python based open source library for bioinformatics.

Scilab On Cloud

May 2012 - Jul 2012

*Guide: Prof. Kannan Moudagalya**Dept. of Chemical Engineering, IIT Bombay*

Scilab is an open source software for numerical computation and is primarily command line/GUI based. We developed a back-end that allowed running Scilab through browser much like the modern day IPython notebooks. This enabled accessing Scilab remotely, even on low configuration devices.

Presented at: [IEEE Conference Cloud Computing and Big Data \(CloudCom-Asia\), 2013](#)

**PROFESSIONAL
EXPERIENCE**

Google Summer of Code 2015 | Mixed Effect Models for *statsmodels* May 2015 - Jul 2015
Student Contract Developer

- *statsmodels* is a Python based library for statistical modeling
- Implemented IPython based notebooks illustrating varied applications of Mixed Effects Models
- Implemented likelihood ratio tests
- Progress Report: <http://statsmodels-mlm-gsoc2015.blogspot.com>

Google Summer of Code | BioJavascript

Jul 2014 - Sep 2014

Student Contract Developer

- BioJavascript is an open source library to facilitate biological data visualization
- Developed 'Human Genetic Variation Viewer', a d3.js based component to visualize genetic variations from SNP databases
- Demo: <http://saketkc.github.io/biojs-genetic-variation-viewer>

Google Summer of Code | Galaxy Project

Jul 2013 - Sep 2013

Student Contract Developer

- Galaxy Project is an open source web-based platform used for reproducible bioinformatics analysis
- Implemented 'nested workflows' that allows users to run a workflow inside a workflow, obviating the need to replicate steps
- Added 'edit on the go' functionality to edit default parameters before runtime
- Progress Report: <http://galaxy-gsoc2013.blogspot.com>

	Google Summer of Code Connexions Project Student Contract Developer	Jul 2012 - Sep 2012
	<ul style="list-style-type: none">- Developed a Python module to allow embedding slide-shows in online notebooks- Created functionality to add user defined quiz as an additional achievement- Progress Report: http://oerpub.github.io/oerpub.rhaptoslabs.slideimporter/	
	SlideShare Software Engineering Intern	May 2011 - Jul 2011
	<ul style="list-style-type: none">- SlideShare is an online platform to view and upload presentations- Developed a Ruby on Rails module to allow administrators to suspend defunct users and data	
OTHER PROJECTS	Image Analysis of Tuberculosis Samples <i>Supervised Learning Project, Collaborator: Hinduja Hospital, Mumbai</i>	Jan 2013 - Apr 2013
	<ul style="list-style-type: none">- Used image processing algorithms to detect probable cases of TB from sputum images- Developed a user friendly GUI to aid histopathologists thus reducing the overall delay in analysis	
	Pratham, Student Satellite Program <i>India's First Students' Satellite Team, IIT Bombay</i>	May 2010 - Oct 2010
	<ul style="list-style-type: none">- Executed hardware testing of the On-board Computer system- Implemented signal processing pipeline for communications subsystem	
TEACHING EXPERIENCE	<ul style="list-style-type: none">- Teaching Assistant, Computer Programming and Utilization- Teaching Assistant, Artificial Intelligence in Process Engineering	Fall 2011 Fall 2013
POSITIONS OF RESPONSIBILITY	Web Manager, UG Academic Council <ul style="list-style-type: none">- Initiated a number of web portals, thus improving online accessibility of academic resources- Awarded Institute Organizational Award	Jul 2012 - Apr 2013
	Institute Internship Coordinator, Practical Training Cell <ul style="list-style-type: none">- Initiated industry and university interaction for student internships	Jul 2011 - Apr 2012
	TechniC, Core Group Member <ul style="list-style-type: none">- Organized institute wide technical events; mentored students	Jul 2010 - Apr 2011
STANDARDIZED TEST SCORES	<ul style="list-style-type: none">- GRE: Quantitative: 170/170 Verbal: 153/170 Analytical Writing: 3.5/6- TOEFL: Reading: 29/30 Listening: 28/30 Speaking: 24/30 Writing:28/30 Total: 109/120	
RELEVANT COURSEWORK AT USC	<ul style="list-style-type: none">- Machine Learning- Numerical Analysis- Biostatistics- Methods of Statistical Inference- Mathematical Statistics- Analysis of Algorithms- Molecular Biology- Introduction to Computational Biology- Seminar in Statistical Consulting- Introduction to Computational Biology- Applied Probability
